This towing hitch is designed to assembly in following cars:
RENAULT MODUS, produced since 04.2004, catalogue no. **G48** and is prepared to tow trailers max total weight **900 kg** and max vertical load **75 kg**.

From manufacturer

Thank you for buying our product. Their reliability has been confirmed in many tests. Reliability of towing hitch depends also on correct assembly and right operation. For this reasons we kindly ask to read carefully this instruction and apply to hints.

The towing hitch should be install in points described by a car producer.

The instruction of the assembly

1. You can install our towing hitch without bumper disassembly, but twist off all fastening bolts underneath.
2. In lower part of the bumper cut out fragment according to figure 2.
3. Disassemble thermal shield over muffler.
4. From outsides of the chassis members are original holes under technical plaster. Remove plaster and uncover original holes. On this holes put fish-plates pos. 13 and through holes put bolts M10x110mm (pos. 10)
5. From inside put side brackets (pos. 4 and 5) on protruding bolt and fix loosely.
6. Between mounted brackets put main bar of the towing hitch (pos. 1) and fix using bolts M12x40mm (pos. 9), use distance fish-plates (pos. 6 and 7)
7. Fix tow-ball (pos. 2) and socket plate (pos. 3) by bolts M12x75mm (pos. 8) from equipment.
8. Fix tight all bolts according to the torque shown in the table.
9. Connect electric wires of 7-poles socket according to the instruction of the car. (Recommend to make at authorized service station)
10. Complete paint layer damaged during installation.

Fig. 2

Torque settings for nuts and bolts (8,8):

M6 - 11 Nm	M 8 - 25 Nm	M 10 - 50 Nm
M 12 - 87 Nm	M 14 - 138 Nm	M16 - 210 Nm

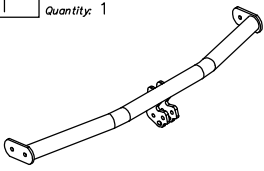

NOTE

After install the towing hitch you should get adequate note in registration book (at authorised service station).The car should be equipped with:

- Indicators
- Tow mirrors

After 1000km check all bolts and nuts. The ball of towing hitch must be always kept clear and conserve with a grease.

Towing hook (without electrical set)

Class: **A50-X** Cat. no. **G48**

Designed for:

Manufacturer: **RENAULT**

Model: **MODUS**

produced since 04.2004

Technical data:

D-value: 5,77 kN

maximum trailer weight: **900 kg**

maximum vertical cup load: **75 kg**

Approval number according to Directive 94/20/EC: **e20*94/20*0064*00**

Foreword

This towing hitch is designed according to rules of safety traffic regulations. The towing hitch is a safety component and can be install only by qualified personnel. Any alteration or conversion of the towing hitch is prohibited and would lead to cancellation of design certification. Remove insulating compound and underseal from vehicle (if present) in the area of the matting surfaces of the towing hitch. The vehicle manufacturer's specifications regarding trailer load and max. vertical cup load are decisive for driving whereat values for the towing hitch cannot be exceeded.

D-value formula:

$$\frac{\text{Max trailer weight [kg]} \times \text{Max vehicle weight [kg]}}{\text{Max trailer weight [kg]} + \text{Max vehicle weight [kg]}} \times \frac{9,81}{1000} = D \text{ [kN]}$$
